## BLOCK STATISTICS

### INTRODUCTION

#### GENERAL

The Supplements to the first series of Housing bulletins include a separate report for each of the 191 cities which in 1930 had a population of 50,000 or more. Each report presents for the city, by blocks, limited tabulations of data obtained in the Housing Census taken as of April 1, 1940, as a part of the Sixteenth Decennial Census of Population. Subjects presented include the number of residential structures; the number of dwelling units classified by occupancy and tenure, year built, color of occupants, number of persons per room, state of repair, and plumbing equipment; the average monthly rent or rental value of dwelling units; and the mortgage status of owner-occupied dwelling units.

Table 1 shows summary figures for the city. Table 2 contains the basic statistics for wards; this table is not shown in the bulletin for a city that is not divided into wards. Table 3 presents the data for blocks in numerical order within wards or block areas. A map showing the ward boundaries, as well as the location of each block, forms a part of the report.

**Related reports.**—The first series of Housing bulletins, which comprises a separate report for each State, presents limited tabulations of the housing data for the State, for urban, rural-nonfarm, and rural-farm areas of the State, for metropolitan districts, and for counties, incorporated places of 1,000 inhabitants or more, and minor civil divisions. The items shown for nonfarm dwelling units in these areas are the same as the items shown in the city Supplements, except that data on year built are not included in the first series bulletin for the State.

In the second series of Housing bulletins for States, more detailed statistics are presented for the State, for urban, rural-nonfarm, and rural-farm areas in the State, for counties, for rural-nonfarm and rural-farm parts of counties, for urban places, and for metropolitan districts. Additional topics covered by the second series include size of household, type of structure, exterior material, year built, number of rooms, lighting equipment, water supply, toilet facilities, bathtub or shower, radio, refrigeration equipment, cooking fuel, heating equipment, heating fuel, value of owner-occupied units, and, for tenant-occupied nonfarm units, gross monthly rent and inclusion of furniture in rent. The more significant items are shown separately for the various occupancy, tenure, and color groups.

The first series of Population bulletins, also issued by States, gives the total population for the State and counties, urban and rural areas in the State and in counties, minor civil divisions, incorporated places, wards of places of 5,000 inhabitants or more, census tracts, and metropolitan districts. Population statistics are not available for city blocks. The second series of Population bulletins presents, for areas similar to those outlined above for the second series Housing bulletins, statistics for the population classified by sex, age, race, nativity, school attendance, and last year of school completed; for the foreign born by citizenship and country of birth; and for the labor force by employment status, broad occupation groups, and selected industries.

**Use of the data for blocks.**—The tabulation of housing characteristics for areas as small as city blocks provides descriptive material of considerable value for technical studies of housing in the city. The statistics will be useful in compiling totals for special types of areas that may be defined to meet the requirements of individual investigators. Users of the data should bear in mind that in practically all cases the data for a given block represent the work of only one enumerator. Consequently, the qualitative housing characteristics are subject to a wider margin of error than is to be expected in the figures for tracts or wards, which represent returns made by a number of enumerators. This qualification applies particularly to the number of dwelling units reported as needing major repairs, since the enumeration of this item depended to a considerable extent upon the judgment of individual enumerators. The misinterpretation by one enumerator of instructions pertaining to a particular item may cause a significant bias in the statistics for a very small area, even though it would have a negligible effect upon the figures for larger areas. Occasional failure to indicate the correct block number for a significant number of dwelling units may also introduce errors into the block data.

#### DEFINITIONS OF TERMS AND EXPLANATIONS

**Dwelling unit.**—A dwelling unit is defined as the living quarters occupied by, or intended for occupancy by, one household. A dwelling unit may be a detached house; a tenement, flat, or apartment in a larger building (an apartment house, an apartment hotel, or a section of a hotel devoted entirely to apartment rather

than transient use); or a room in a structure primarily devoted to business or other nonresidential purposes. It may be a superintendent's living quarters in a public building, such as a courthouse or library; a watchman's living quarters in a factory, store, or warehouse; a chauffeur's living quarters in a garage; or a tourist cabin, trailer, railroad car, boat, tent, etc., if occupied by persons having no other place of residence.

All occupied dwelling units and vacant dwelling units in habitable structures, seasonal as well as ordinary, were included in the canvass for housing data, except the following special types of dwelling places: Hotels for transient guests, and similar places maintained by the Y. M. C. A. or kindred organizations; missions, cheap one-night lodginghouses; dormitories for students; nurses' homes; educational or religious institutions; military institutions; penal institutions; soldiers' homes; homes for orphans and for the aged, blind, deaf, infirm, or incurable; Civilian Conservation Corps camps; Coast Guard stations; and lumber camps, or railroad or other construction camps, in which the workers live in a common barracks. These special types of dwelling places were not considered as part of the housing market, and in general their exclusion is consistent with the exclusion of quasi-family groups from the statistics of private families, as in the 1930 report on families. Dwelling units occupied by officials or employees of such places (except on military reservations) are included in the Housing census if they constitute separate living quarters in a detached house or in a multifamily structure containing no persons enumerated as part of the institutional population. In the case of Government-owned dwelling units in United States military reservations, neither private living quarters for families of officers or employees nor barracks for enlisted men are included in the data presented for housing.

The fact that the premises occupied by hotel and institutional groups are excluded from the statistics presented for occupied dwelling units should be considered in comparisons of the statistics on population and housing for a given area. The population in institutions may account for a large proportion of the total population of a small area.

**Residential structure.**—A residential structure is a building that contains one or more dwelling units. Each single-family or two-family house, apartment house, or other residential building constitutes a separate structure. Each house in a block of three or more "row" houses is counted as a separate structure, but a building which contains only two attached dwelling units constitutes one two-family structure. A building designed for business or other nonresidential use was not enumerated unless it contained one or more dwelling units.

**Occupancy and tenure.**—Dwelling units are classified by occupancy and tenure into four groups: Owner-occupied; tenant-occupied; vacant, for sale or rent; and vacant, other (not for sale or rent). Dwelling units are classified as occupied if they were occupied at the time of enumeration by households enumerated in the Population census at their usual place of residence. A dwelling unit is owner-occupied if it is owned either wholly or in part by the head of the household or by some related member of his family living in the dwelling unit. All other occupied units are classified as tenant-occupied whether or not cash rent is actually paid for the living quarters. Rent-free quarters and living accommodations received in payment for services performed are thus included with the tenant-occupied units.

The group "vacant, for sale or rent" includes all vacant dwelling units available for occupancy, even though not actually offered in the housing market at the time of enumeration. Dwelling units in "boarded-up" structures are excluded if they were beyond repair. The percentage of all dwelling units in the city that were vacant and for sale or rent on April 1, 1940, as shown in table 1, represents what is commonly referred to as the vacancy ratio. The relatively small group classified as "Vacant, not for sale or rent" represents chiefly dwelling units neither occupied nor available for sale or rent at the time of enumeration because they were being held for absent households. While many of these are for seasonal use only, others are the usual place of residence of households for which population data were enumerated elsewhere and reallocated to the home district. Dwelling units occupied temporarily by nonresident households are also included in this category.

**Year built.**—Dwelling units are classified according to the calendar year in which the building was completed. This refers to the original construction, not to any later remodeling, additions, reconstruction, or conversion.

**Color of occupants.**—Occupied dwelling units are classified by color of head of household, according to the definition used in the 1940 Census of Population. In this report two categories are presented, "white" and "nonwhite." The classification "White" includes persons of Mexican birth or ancestry who were not definitely Indian or of other nonwhite race. "Nonwhite" comprises Negro, Indian, Chinese, Japanese, Filipino, Hindu, Korean, or other nonwhite race, and persons of mixed white and nonwhite parentage.

**Persons per room.**—The number of persons per room, used as an index of crowding, has been computed for each occupied unit. The number of dwelling units classified as having more than one and one-half persons per room is shown for each area. All persons enumerated in the Population census as members of the household (including lodgers, servants, and other nonrelated persons) are counted in determining the number of persons that occupy each dwelling unit. The number of rooms in the dwelling unit includes all rooms avail-

able for use throughout the year. Bathrooms, closets, pantries, halls, screened porches, and unfinished rooms in the basement and attic are not counted as rooms.

**State of repair and plumbing equipment.**—Instructions to enumerators specified that dwelling units were to be classified as "needing major repairs" when repairs were needed on such parts of the structure as floors, roof, plaster, walls, or foundations, the continued neglect of which would impair the soundness of the structure and create a hazard to its safety as a place of residence. The data on state of repair are tabulated in combination with selected types of plumbing equipment and are therefore limited to dwelling units for which all of the various items in the combination were reported. In table 3 the phrase "needing major repairs" has been shortened to "needing repair" because of the space limitation.

**Contract or estimated rent.**—The average monthly rent or rental value of all dwelling units in each block is obtained by dividing the total amount of rent or estimated rental value reported by the number of dwelling units for which these items were reported. The enumerator was instructed to report for each tenant-occupied nonfarm dwelling unit the monthly contract rent, or, if no cash rent was paid, the estimated monthly rental value based on rents for similar dwelling units in the neighborhood; for each owner-occupied nonfarm dwelling unit, the owner's estimate of its monthly rental value; and for each vacant unit, the rent asked or the estimated rental value. The rental reported for a vacant seasonal dwelling unit represents the actual or estimated monthly amount charged for the unit during the portion of the year it is generally occupied; in resort areas, the average rent may be relatively high for this reason.

**Mortgage status.**—The mortgage data presented relate to owner-occupied nonfarm dwelling units in structures without business and containing not more than four dwelling units. Such a dwelling unit is classified as mortgaged if there is an indebtedness in the form of a mortgage, a deed of trust, or a land contract that is secured by it or by the property of which it is a part.

**Dwelling units reporting.**—All dwelling units are classified by occupancy and tenure, and all occupied units are classified by color of occupants. The corresponding percentage distributions shown for these items in table 1 are based on all dwelling units and all occupied units, respectively. For other subjects, such as state of repair and plumbing equipment, the percentages shown are based on the dwelling units for which specific characteristics are reported, that is, the total shown as "number reporting." The number of dwelling units for which the enumerator obtained no report on a particular item is shown for the city totals only; however, the corresponding figures can easily be derived for each area presented in tables 2 and 3 by subtracting the number reporting from the total number of dwelling units (or total occupied) shown for the area.

**Use of map.—Block identification.**—Blocks are identified by serial numbers, a separate series of numbers being used for each ward or for a group of wards. Thus the location of each block for which data are presented in table 3 may be determined by referring to the ward designation and block number shown on the map which appears at the end of this Supplement. Similarly, data for a specific block may be readily located in the table if reference is made to the map for the identification numbers of the ward and block.

In some instances "block-areas," which have been established to facilitate the numbering of blocks in groups of less than 1,000, cause a break in the sequence of block numbers within a ward. Where this occurs each part that is in a separate block area is distinguished on the map, and in the table the data are shown for blocks in numerical order within each block area section of the ward. Occasionally, when the boundary of a ward cuts through the middle of a block, separate segments of the block are identified on the map by suffix letters not shown on the table. For example, if block 46 is divided into two parts by a ward boundary, the northern part in ward 6 is shown on the map as block 46N, but in the table it is identified simply as block 46 in ward 6.

If no dwelling units are reported for a block, the block number is not listed in table 3, although it is shown on the map. Dwelling units for which the block number was not reported are indicated in the table by the symbol "NR." It will be noted that detailed data are not shown for such dwelling units, nor for blocks containing fewer than three dwelling units. All dwelling units are included, however, in the statistics for the city and for each ward.

## BLOCK STATISTICS

### INTRODUCTION

#### GENERAL

The Supplements to the first series of Housing bulletins include a separate report for each of the 191 cities which in 1930 had a population of 50,000 or more. Each report presents for the city, by blocks, limited tabulations of data obtained in the Housing Census taken as of April 1, 1940, as a part of the Sixteenth Decennial Census of Population. Subjects presented include the number of residential structures; the number of dwelling units classified by occupancy and tenure, year built, color of occupants, number of persons per room, state of repair, and plumbing equipment; the average monthly rent or rental value of dwelling units; and the mortgage status of owner-occupied dwelling units.

Table 1 shows summary figures for the city. Table 2 contains the basic statistics for wards; this table is not shown in the bulletin for a city that is not divided into wards. Table 3 presents the data for blocks in numerical order within wards or block areas. A map showing the ward boundaries, as well as the location of each block, forms a part of the report.

**Related reports.**—The first series of Housing bulletins, which comprises a separate report for each State, presents limited tabulations of the housing data for the State, for urban, rural-nonfarm, and rural-farm areas of the State, for metropolitan districts, and for counties, incorporated places of 1,000 inhabitants or more, and minor civil divisions. The items shown for nonfarm dwelling units in these areas are the same as the items shown in the city Supplements, except that data on year built are not included in the first series bulletin for the State.

In the second series of Housing bulletins for States, more detailed statistics are presented for the State, for urban, rural-nonfarm, and rural-farm areas in the State, for counties, for rural-nonfarm and rural-farm parts of counties, for urban places, and for metropolitan districts. Additional topics covered by the second series include size of household, type of structure, exterior material, year built, number of rooms, lighting equipment, water supply, toilet facilities, bathtub or shower, radio, refrigeration equipment, cooking fuel, heating equipment, heating fuel, value of owner-occupied units, and, for tenant-occupied nonfarm units, gross monthly rent and inclusion of furniture in rent. The more significant items are shown separately for the various occupancy, tenure, and color groups.

The first series of Population bulletins, also issued by States, gives the total population for the State and counties, urban and rural areas in the State and in counties, minor civil divisions, incorporated places, wards of places of 5,000 inhabitants or more, census tracts, and metropolitan districts. Population statistics are not available for city blocks. The second series of Population bulletins presents, for areas similar to those outlined above for the second series Housing bulletins, statistics for the population classified by sex, age, race, nativity, school attendance, and last year of school completed; for the foreign born by citizenship and country of birth; and for the labor force by employment status, broad occupation groups, and selected industries.

**Use of the data for blocks.**—The tabulation of housing characteristics for areas as small as city blocks provides descriptive material of considerable value for technical studies of housing in the city. The statistics will be useful in compiling totals for special types of areas that may be defined to meet the requirements of individual investigators. Users of the data should bear in mind that in practically all cases the data for a given block represent the work of only one enumerator. Consequently, the qualitative housing characteristics are subject to a wider margin of error than is to be expected in the figures for tracts or wards, which represent returns made by a number of enumerators. This qualification applies particularly to the number of dwelling units reported as needing major repairs, since the enumeration of this item depended to a considerable extent upon the judgment of individual enumerators. The misinterpretation by one enumerator of instructions pertaining to a particular item may cause a significant bias in the statistics for a very small area, even though it would have a negligible effect upon the figures for larger areas. Occasional failure to indicate the correct block number for a significant number of dwelling units may also introduce errors into the block data.

#### DEFINITIONS OF TERMS AND EXPLANATIONS

**Dwelling unit.**—A dwelling unit is defined as the living quarters occupied by, or intended for occupancy by, one household. A dwelling unit may be a detached house; a tenement, flat, or apartment in a larger building (an apartment house, an apartment hotel, or a section of a hotel devoted entirely to apartment rather

than transient use); or a room in a structure primarily devoted to business or other nonresidential purposes. It may be a superintendent's living quarters in a public building, such as a courthouse or library; a watchman's living quarters in a factory, store, or warehouse; a chauffeur's living quarters in a garage; or a tourist cabin, trailer, railroad car, boat, tent, etc., if occupied by persons having no other place of residence.

All occupied dwelling units and vacant dwelling units in habitable structures, seasonal as well as ordinary, were included in the canvass for housing data, except the following special types of dwelling places: Hotels for transient guests, and similar places maintained by the Y. M. C. A. or kindred organizations; missions, cheap one-night lodginghouses; dormitories for students; nurses' homes; educational or religious institutions; military institutions; penal institutions; soldiers' homes; homes for orphans and for the aged, blind, deaf, infirm, or incurable; Civilian Conservation Corps camps; Coast Guard stations; and lumber camps, or railroad or other construction camps, in which the workers live in a common barracks. These special types of dwelling places were not considered as part of the housing market, and in general their exclusion is consistent with the exclusion of quasi-family groups from the statistics of private families, as in the 1930 report on families. Dwelling units occupied by officials or employees of such places (except on military reservations) are included in the Housing census if they constitute separate living quarters in a detached house or in a multifamily structure containing no persons enumerated as part of the institutional population. In the case of Government-owned dwelling units in United States military reservations, neither private living quarters for families of officers or employees nor barracks for enlisted men are included in the data presented for housing.

The fact that the premises occupied by hotel and institutional groups are excluded from the statistics presented for occupied dwelling units should be considered in comparisons of the statistics on population and housing for a given area. The population in institutions may account for a large proportion of the total population of a small area.

**Residential structure.**—A residential structure is a building that contains one or more dwelling units. Each single-family or two-family house, apartment house, or other residential building constitutes a separate structure. Each house in a block of three or more "row" houses is counted as a separate structure, but a building which contains only two attached dwelling units constitutes one two-family structure. A building designed for business or other nonresidential use was not enumerated unless it contained one or more dwelling units.

**Occupancy and tenure.**—Dwelling units are classified by occupancy and tenure into four groups: Owner-occupied; tenant-occupied; vacant, for sale or rent; and vacant, other (not for sale or rent). Dwelling units are classified as occupied if they were occupied at the time of enumeration by households enumerated in the Population census at their usual place of residence. A dwelling unit is owner-occupied if it is owned either wholly or in part by the head of the household or by some related member of his family living in the dwelling unit. All other occupied units are classified as tenant-occupied whether or not cash rent is actually paid for the living quarters. Rent-free quarters and living accommodations received in payment for services performed are thus included with the tenant-occupied units.

The group "vacant, for sale or rent" includes all vacant dwelling units available for occupancy, even though not actually offered in the housing market at the time of enumeration. Dwelling units in "boarded-up" structures are excluded if they were beyond repair. The percentage of all dwelling units in the city that were vacant and for sale or rent on April 1, 1940, as shown in table 1, represents what is commonly referred to as the vacancy ratio. The relatively small group classified as "Vacant, not for sale or rent" represents chiefly dwelling units neither occupied nor available for sale or rent at the time of enumeration because they were being held for absent households. While many of these are for seasonal use only, others are the usual place of residence of households for which population data were enumerated elsewhere and reallocated to the home district. Dwelling units occupied temporarily by nonresident households are also included in this category.

**Year built.**—Dwelling units are classified according to the calendar year in which the building was completed. This refers to the original construction, not to any later remodeling, additions, reconstruction, or conversion.

**Color of occupants.**—Occupied dwelling units are classified by color of head of household, according to the definition used in the 1940 Census of Population. In this report two categories are presented, "white" and "nonwhite." The classification "White" includes persons of Mexican birth or ancestry who were not definitely Indian or of other nonwhite race. "Nonwhite" comprises Negro, Indian, Chinese, Japanese, Filipino, Hindu, Korean, or other nonwhite race, and persons of mixed white and nonwhite parentage.

**Persons per room.**—The number of persons per room, used as an index of crowding, has been computed for each occupied unit. The number of dwelling units classified as having more than one and one-half persons per room is shown for each area. All persons enumerated in the Population census as members of the household (including lodgers, servants, and other nonrelated persons) are counted in determining the number of persons that occupy each dwelling unit. The number of rooms in the dwelling unit includes all rooms avail-

able for use throughout the year. Bathrooms, closets, pantries, halls, screened porches, and unfinished rooms in the basement and attic are not counted as rooms.

**State of repair and plumbing equipment.**—Instructions to enumerators specified that dwelling units were to be classified as "needing major repairs" when repairs were needed on such parts of the structure as floors, roof, plaster, walls, or foundations, the continued neglect of which would impair the soundness of the structure and create a hazard to its safety as a place of residence. The data on state of repair are tabulated in combination with selected types of plumbing equipment and are therefore limited to dwelling units for which all of the various items in the combination were reported. In table 3 the phrase "needing major repairs" has been shortened to "needing repair" because of the space limitation.

**Contract or estimated rent.**—The average monthly rent or rental value of all dwelling units in each block is obtained by dividing the total amount of rent or estimated rental value reported by the number of dwelling units for which these items were reported. The enumerator was instructed to report for each tenant-occupied nonfarm dwelling unit the monthly contract rent, or, if no cash rent was paid, the estimated monthly rental value based on rents for similar dwelling units in the neighborhood; for each owner-occupied nonfarm dwelling unit, the owner's estimate of its monthly rental value; and for each vacant unit, the rent asked or the estimated rental value. The rental reported for a vacant seasonal dwelling unit represents the actual or estimated monthly amount charged for the unit during the portion of the year it is generally occupied; in resort areas, the average rent may be relatively high for this reason.

**Mortgage status.**—The mortgage data presented relate to owner-occupied nonfarm dwelling units in structures without business and containing not more than four dwelling units. Such a dwelling unit is classified as mortgaged if there is an indebtedness in the form of a mortgage, a deed of trust, or a land contract that is secured by it or by the property of which it is a part.

**Dwelling units reporting.**—All dwelling units are classified by occupancy and tenure, and all occupied units are classified by color of occupants. The corresponding percentage distributions shown for these items in table 1 are based on all dwelling units and all occupied units, respectively. For other subjects, such as state of repair and plumbing equipment, the percentages shown are based on the dwelling units for which specific characteristics are reported, that is, the total shown as "number reporting." The number of dwelling units for which the enumerator obtained no report on a particular item is shown for the city totals only; however, the corresponding figures can easily be derived for each area presented in tables 2 and 3 by subtracting the number reporting from the total number of dwelling units (or total occupied) shown for the area.

**Use of map.—Block identification.**—Blocks are identified by serial numbers, a separate series of numbers being used for each ward or for a group of wards. Thus the location of each block for which data are presented in table 3 may be determined by referring to the ward designation and block number shown on the map which appears at the end of this Supplement. Similarly, data for a specific block may be readily located in the table if reference is made to the map for the identification numbers of the ward and block.

In some instances "block-areas," which have been established to facilitate the numbering of blocks in groups of less than 1,000, cause a break in the sequence of block numbers within a ward. Where this occurs each part that is in a separate block area is distinguished on the map, and in the table the data are shown for blocks in numerical order within each block area section of the ward. Occasionally, when the boundary of a ward cuts through the middle of a block, separate segments of the block are identified on the map by suffix letters not shown on the table. For example, if block 46 is divided into two parts by a ward boundary, the northern part in ward 6 is shown on the map as block 46N, but in the table it is identified simply as block 46 in ward 6.

If no dwelling units are reported for a block, the block number is not listed in table 3, although it is shown on the map. Dwelling units for which the block number was not reported are indicated in the table by the symbol "NR." It will be noted that detailed data are not shown for such dwelling units, nor for blocks containing fewer than three dwelling units. All dwelling units are included, however, in the statistics for the city and for each ward.

## BLOCK STATISTICS

### INTRODUCTION

#### GENERAL

The Supplements to the first series of Housing bulletins include a separate report for each of the 191 cities which in 1930 had a population of 50,000 or more. Each report presents for the city, by blocks, limited tabulations of data obtained in the Housing Census taken as of April 1, 1940, as a part of the Sixteenth Decennial Census of Population. Subjects presented include the number of residential structures; the number of dwelling units classified by occupancy and tenure, year built, color of occupants, number of persons per room, state of repair, and plumbing equipment; the average monthly rent or rental value of dwelling units; and the mortgage status of owner-occupied dwelling units.

Table 1 shows summary figures for the city. Table 2 contains the basic statistics for wards; this table is not shown in the bulletin for a city that is not divided into wards. Table 3 presents the data for blocks in numerical order within wards or block areas. A map showing the ward boundaries, as well as the location of each block, forms a part of the report.

**Related reports.**—The first series of Housing bulletins, which comprises a separate report for each State, presents limited tabulations of the housing data for the State, for urban, rural-nonfarm, and rural-farm areas of the State, for metropolitan districts, and for counties, incorporated places of 1,000 inhabitants or more, and minor civil divisions. The items shown for nonfarm dwelling units in these areas are the same as the items shown in the city Supplements, except that data on year built are not included in the first series bulletin for the State.

In the second series of Housing bulletins for States, more detailed statistics are presented for the State, for urban, rural-nonfarm, and rural-farm areas in the State, for counties, for rural-nonfarm and rural-farm parts of counties, for urban places, and for metropolitan districts. Additional topics covered by the second series include size of household, type of structure, exterior material, year built, number of rooms, lighting equipment, water supply, toilet facilities, bathtub or shower, radio, refrigeration equipment, cooking fuel, heating equipment, heating fuel, value of owner-occupied units, and, for tenant-occupied nonfarm units, gross monthly rent and inclusion of furniture in rent. The more significant items are shown separately for the various occupancy, tenure, and color groups.

The first series of Population bulletins, also issued by States, gives the total population for the State and counties, urban and rural areas in the State and in counties, minor civil divisions, incorporated places, wards of places of 5,000 inhabitants or more, census tracts, and metropolitan districts. Population statistics are not available for city blocks. The second series of Population bulletins presents, for areas similar to those outlined above for the second series Housing bulletins, statistics for the population classified by sex, age, race, nativity, school attendance, and last year of school completed; for the foreign born by citizenship and country of birth; and for the labor force by employment status, broad occupation groups, and selected industries.

**Use of the data for blocks.**—The tabulation of housing characteristics for areas as small as city blocks provides descriptive material of considerable value for technical studies of housing in the city. The statistics will be useful in compiling totals for special types of areas that may be defined to meet the requirements of individual investigators. Users of the data should bear in mind that in practically all cases the data for a given block represent the work of only one enumerator. Consequently, the qualitative housing characteristics are subject to a wider margin of error than is to be expected in the figures for tracts or wards, which represent returns made by a number of enumerators. This qualification applies particularly to the number of dwelling units reported as needing major repairs, since the enumeration of this item depended to a considerable extent upon the judgment of individual enumerators. The misinterpretation by one enumerator of instructions pertaining to a particular item may cause a significant bias in the statistics for a very small area, even though it would have a negligible effect upon the figures for larger areas. Occasional failure to indicate the correct block number for a significant number of dwelling units may also introduce errors into the block data.

#### DEFINITIONS OF TERMS AND EXPLANATIONS

**Dwelling unit.**—A dwelling unit is defined as the living quarters occupied by, or intended for occupancy by, one household. A dwelling unit may be a detached house; a tenement, flat, or apartment in a larger building (an apartment house, an apartment hotel, or a section of a hotel devoted entirely to apartment rather

than transient use); or a room in a structure primarily devoted to business or other nonresidential purposes. It may be a superintendent's living quarters in a public building, such as a courthouse or library; a watchman's living quarters in a factory, store, or warehouse; a chauffeur's living quarters in a garage; or a tourist cabin, trailer, railroad car, boat, tent, etc., if occupied by persons having no other place of residence.

All occupied dwelling units and vacant dwelling units in habitable structures, seasonal as well as ordinary, were included in the canvass for housing data, except the following special types of dwelling places: Hotels for transient guests, and similar places maintained by the Y. M. C. A. or kindred organizations; missions, cheap one-night lodginghouses; dormitories for students; nurses' homes; educational or religious institutions; military institutions; penal institutions; soldiers' homes; homes for orphans and for the aged, blind, deaf, infirm, or incurable; Civilian Conservation Corps camps; Coast Guard stations; and lumber camps, or railroad or other construction camps, in which the workers live in a common barracks. These special types of dwelling places were not considered as part of the housing market, and in general their exclusion is consistent with the exclusion of quasi-family groups from the statistics of private families, as in the 1930 report on families. Dwelling units occupied by officials or employees of such places (except on military reservations) are included in the Housing census if they constitute separate living quarters in a detached house or in a multifamily structure containing no persons enumerated as part of the institutional population. In the case of Government-owned dwelling units in United States military reservations, neither private living quarters for families of officers or employees nor barracks for enlisted men are included in the data presented for housing.

The fact that the premises occupied by hotel and institutional groups are excluded from the statistics presented for occupied dwelling units should be considered in comparisons of the statistics on population and housing for a given area. The population in institutions may account for a large proportion of the total population of a small area.

**Residential structure.**—A residential structure is a building that contains one or more dwelling units. Each single-family or two-family house, apartment house, or other residential building constitutes a separate structure. Each house in a block of three or more "row" houses is counted as a separate structure, but a building which contains only two attached dwelling units constitutes one two-family structure. A building designed for business or other nonresidential use was not enumerated unless it contained one or more dwelling units.

**Occupancy and tenure.**—Dwelling units are classified by occupancy and tenure into four groups: Owner-occupied; tenant-occupied; vacant, for sale or rent; and vacant, other (not for sale or rent). Dwelling units are classified as occupied if they were occupied at the time of enumeration by households enumerated in the Population census at their usual place of residence. A dwelling unit is owner-occupied if it is owned either wholly or in part by the head of the household or by some related member of his family living in the dwelling unit. All other occupied units are classified as tenant-occupied whether or not cash rent is actually paid for the living quarters. Rent-free quarters and living accommodations received in payment for services performed are thus included with the tenant-occupied units.

The group "Vacant, for sale or rent" includes all vacant dwelling units available for occupancy, even though not actually offered in the housing market at the time of enumeration. Dwelling units in "boarded-up" structures are excluded if they were beyond repair. The percentage of all dwelling units in the city that were vacant and for sale or rent on April 1, 1940, as shown in table 1, represents what is commonly referred to as the vacancy ratio. The relatively small group classified as "Vacant, not for sale or rent" represents chiefly dwelling units neither occupied nor available for sale or rent at the time of enumeration because they were being held for absent households. While many of these are for seasonal use only, others are the usual place of residence of households for which population data were enumerated elsewhere and reallocated to the home district. Dwelling units occupied temporarily by nonresident households are also included in this category.

**Year built.**—Dwelling units are classified according to the calendar year in which the building was completed. This refers to the original construction, not to any later remodeling, additions, reconstruction, or conversion.

**Color of occupants.**—Occupied dwelling units are classified by color of head of household, according to the definition used in the 1940 Census of Population. In this report two categories are presented, "white" and "nonwhite." The classification "White" includes persons of Mexican birth or ancestry who were not definitely Indian or of other nonwhite race. "Nonwhite" comprises Negro, Indian, Chinese, Japanese, Filipino, Hindu, Korean, or other nonwhite race, and persons of mixed white and nonwhite parentage.

**Persons per room.**—The number of persons per room, used as an index of crowding, has been computed for each occupied unit. The number of dwelling units classified as having more than one and one-half persons per room is shown for each area. All persons enumerated in the Population census as members of the household (including lodgers, servants, and other nonrelated persons) are counted in determining the number of persons that occupy each dwelling unit. The number of rooms in the dwelling unit includes all rooms avail-

able for use throughout the year. Bathrooms, closets, pantries, halls, screened porches, and unfinished rooms in the basement and attic are not counted as rooms.

**State of repair and plumbing equipment.**—Instructions to enumerators specified that dwelling units were to be classified as "needing major repairs" when repairs were needed on such parts of the structure as floors, roof, plaster, walls, or foundations, the continued neglect of which would impair the soundness of the structure and create a hazard to its safety as a place of residence. The data on state of repair are tabulated in combination with selected types of plumbing equipment and are therefore limited to dwelling units for which all of the various items in the combination were reported. In table 3 the phrase "needing major repairs" has been shortened to "needing repair" because of the space limitation.

**Contract or estimated rent.**—The average monthly rent or rental value of all dwelling units in each block is obtained by dividing the total amount of rent or estimated rental value reported by the number of dwelling units for which these items were reported. The enumerator was instructed to report for each tenant-occupied nonfarm dwelling unit the monthly contract rent, or, if no cash rent was paid, the estimated monthly rental value based on rents for similar dwelling units in the neighborhood; for each owner-occupied nonfarm dwelling unit, the owner's estimate of its monthly rental value; and for each vacant unit, the rent asked or the estimated rental value. The rental reported for a vacant seasonal dwelling unit represents the actual or estimated monthly amount charged for the unit during the portion of the year it is generally occupied; in resort areas, the average rent may be relatively high for this reason.

**Mortgage status.**—The mortgage data presented relate to owner-occupied nonfarm dwelling units in structures without business and containing not more than four dwelling units. Such a dwelling unit is classified as mortgaged if there is an indebtedness in the form of a mortgage, a deed of trust, or a land contract that is secured by it or by the property of which it is a part.

**Dwelling units reporting.**—All dwelling units are classified by occupancy and tenure, and all occupied units are classified by color of occupants. The corresponding percentage distributions shown for these items in table 1 are based on all dwelling units and all occupied units, respectively. For other subjects, such as state of repair and plumbing equipment, the percentages shown are based on the dwelling units for which specific characteristics are reported, that is, the total shown as "number reporting." The number of dwelling units for which the enumerator obtained no report on a particular item is shown for the city totals only; however, the corresponding figures can easily be derived for each area presented in tables 2 and 3 by subtracting the number reporting from the total number of dwelling units (or total occupied) shown for the area.

**Use of map.—Block identification.**—Blocks are identified by serial numbers, a separate series of numbers being used for each ward or for a group of wards. Thus the location of each block for which data are presented in table 3 may be determined by referring to the ward designation and block number shown on the map which appears at the end of this Supplement. Similarly, data for a specific block may be readily located in the table if reference is made to the map for the identification numbers of the ward and block.

In some instances "block-areas," which have been established to facilitate the numbering of blocks in groups of less than 1,000, cause a break in the sequence of block numbers within a ward. Where this occurs each part that is in a separate block area is distinguished on the map, and in the table the data are shown for blocks in numerical order within each block area section of the ward. Occasionally, when the boundary of a ward cuts through the middle of a block, separate segments of the block are identified on the map by suffix letters not shown on the table. For example, if block 46 is divided into two parts by a ward boundary, the northern part in ward 6 is shown on the map as block 46N, but in the table it is identified simply as block 46 in ward 6.

If no dwelling units are reported for a block, the block number is not listed in table 3, although it is shown on the map. Dwelling units for which the block number was not reported are indicated in the table by the symbol "NR." It will be noted that detailed data are not shown for such dwelling units, nor for blocks containing fewer than three dwelling units. All dwelling units are included, however, in the statistics for the city and for each ward.

## BLOCK STATISTICS

### INTRODUCTION

#### GENERAL

The Supplements to the first series of Housing bulletins include a separate report for each of the 191 cities which in 1930 had a population of 50,000 or more. Each report presents for the city, by blocks, limited tabulations of data obtained in the Housing Census taken as of April 1, 1940, as a part of the Sixteenth Decennial Census of Population. Subjects presented include the number of residential structures; the number of dwelling units classified by occupancy and tenure, year built, color of occupants, number of persons per room, state of repair, and plumbing equipment; the average monthly rent or rental value of dwelling units; and the mortgage status of owner-occupied dwelling units.

Table 1 shows summary figures for the city. Table 2 contains the basic statistics for wards; this table is not shown in the bulletin for a city that is not divided into wards. Table 3 presents the data for blocks in numerical order within wards or block areas. A map showing the ward boundaries, as well as the location of each block, forms a part of the report.

**Related reports.**—The first series of Housing bulletins, which comprises a separate report for each State, presents limited tabulations of the housing data for the State, for urban, rural-nonfarm, and rural-farm areas of the State, for metropolitan districts, and for counties, incorporated places of 1,000 inhabitants or more, and minor civil divisions. The items shown for nonfarm dwelling units in these areas are the same as the items shown in the city Supplements, except that data on year built are not included in the first series bulletin for the State.

In the second series of Housing bulletins for States, more detailed statistics are presented for the State, for urban, rural-nonfarm, and rural-farm areas in the State, for counties, for rural-nonfarm and rural-farm parts of counties, for urban places, and for metropolitan districts. Additional topics covered by the second series include size of household, type of structure, exterior material, year built, number of rooms, lighting equipment, water supply, toilet facilities, bathtub or shower, radio, refrigeration equipment, cooking fuel, heating equipment, heating fuel, value of owner-occupied units, and, for tenant-occupied nonfarm units, gross monthly rent and inclusion of furniture in rent. The more significant items are shown separately for the various occupancy, tenure, and color groups.

The first series of Population bulletins, also issued by States, gives the total population for the State and counties, urban and rural areas in the State and in counties, minor civil divisions, incorporated places, wards of places of 5,000 inhabitants or more, census tracts, and metropolitan districts. Population statistics are not available for city blocks. The second series of Population bulletins presents, for areas similar to those outlined above for the second series Housing bulletins, statistics for the population classified by sex, age, race, nativity, school attendance, and last year of school completed; for the foreign born by citizenship and country of birth; and for the labor force by employment status, broad occupation groups, and selected industries.

**Use of the data for blocks.**—The tabulation of housing characteristics for areas as small as city blocks provides descriptive material of considerable value for technical studies of housing in the city. The statistics will be useful in compiling totals for special types of areas that may be defined to meet the requirements of individual investigators. Users of the data should bear in mind that in practically all cases the data for a given block represent the work of only one enumerator. Consequently, the qualitative housing characteristics are subject to a wider margin of error than is to be expected in the figures for tracts or wards, which represent returns made by a number of enumerators. This qualification applies particularly to the number of dwelling units reported as needing major repairs, since the enumeration of this item depended to a considerable extent upon the judgment of individual enumerators. The misinterpretation by one enumerator of instructions pertaining to a particular item may cause a significant bias in the statistics for a very small area, even though it would have a negligible effect upon the figures for larger areas. Occasional failure to indicate the correct block number for a significant number of dwelling units may also introduce errors into the block data.

#### DEFINITIONS OF TERMS AND EXPLANATIONS

**Dwelling unit.**—A dwelling unit is defined as the living quarters occupied by, or intended for occupancy by, one household. A dwelling unit may be a detached house; a tenement, flat, or apartment in a larger building (an apartment house, an apartment hotel, or a section of a hotel devoted entirely to apartment rather

than transient use); or a room in a structure primarily devoted to business or other nonresidential purposes. It may be a superintendent's living quarters in a public building, such as a courthouse or library; a watchman's living quarters in a factory, store, or warehouse; a chauffeur's living quarters in a garage; or a tourist cabin, trailer, railroad car, boat, tent, etc., if occupied by persons having no other place of residence.

All occupied dwelling units and vacant dwelling units in habitable structures, seasonal as well as ordinary, were included in the canvass for housing data, except the following special types of dwelling places: Hotels for transient guests, and similar places maintained by the Y. M. C. A. or kindred organizations; missions, cheap one-night lodginghouses; dormitories for students; nurses' homes; educational or religious institutions; military institutions; penal institutions; soldiers' homes; homes for orphans and for the aged, blind, deaf, infirm, or incurable; Civilian Conservation Corps camps; Coast Guard stations; and lumber camps, or railroad or other construction camps, in which the workers live in a common barracks. These special types of dwelling places were not considered as part of the housing market, and in general their exclusion is consistent with the exclusion of quasi-family groups from the statistics of private families, as in the 1930 report on families. Dwelling units occupied by officials or employees of such places (except on military reservations) are included in the Housing census if they constitute separate living quarters in a detached house or in a multifamily structure containing no persons enumerated as part of the institutional population. In the case of Government-owned dwelling units in United States military reservations, neither private living quarters for families of officers or employees nor barracks for enlisted men are included in the data presented for housing.

The fact that the premises occupied by hotel and institutional groups are excluded from the statistics presented for occupied dwelling units should be considered in comparisons of the statistics on population and housing for a given area. The population in institutions may account for a large proportion of the total population of a small area.

**Residential structure.**—A residential structure is a building that contains one or more dwelling units. Each single-family or two-family house, apartment house, or other residential building constitutes a separate structure. Each house in a block of three or more "row" houses is counted as a separate structure, but a building which contains only two attached dwelling units constitutes one two-family structure. A building designed for business or other nonresidential use was not enumerated unless it contained one or more dwelling units.

**Occupancy and tenure.**—Dwelling units are classified by occupancy and tenure into four groups: Owner-occupied; tenant-occupied; vacant, for sale or rent; and vacant, other (not for sale or rent). Dwelling units are classified as occupied if they were occupied at the time of enumeration by households enumerated in the Population census at their usual place of residence. A dwelling unit is owner-occupied if it is owned either wholly or in part by the head of the household or by some related member of his family living in the dwelling unit. All other occupied units are classified as tenant-occupied whether or not cash rent is actually paid for the living quarters. Rent-free quarters and living accommodations received in payment for services performed are thus included with the tenant-occupied units.

The group "Vacant, for sale or rent" includes all vacant dwelling units available for occupancy, even though not actually offered in the housing market at the time of enumeration. Dwelling units in "boarded-up" structures are excluded if they were beyond repair. The percentage of all dwelling units in the city that were vacant and for sale or rent on April 1, 1940, as shown in table 1, represents what is commonly referred to as the vacancy ratio. The relatively small group classified as "Vacant, not for sale or rent" represents chiefly dwelling units neither occupied nor available for sale or rent at the time of enumeration because they were being held for absent households. While many of these are for seasonal use only, others are the usual place of residence of households for which population data were enumerated elsewhere and reallocated to the home district. Dwelling units occupied temporarily by nonresident households are also included in this category.

**Year built.**—Dwelling units are classified according to the calendar year in which the building was completed. This refers to the original construction, not to any later remodeling, additions, reconstruction, or conversion.

**Color of occupants.**—Occupied dwelling units are classified by color of head of household, according to the definition used in the 1940 Census of Population. In this report two categories are presented, "white" and "nonwhite." The classification "White" includes persons of Mexican birth or ancestry who were not definitely Indian or of other nonwhite race. "Nonwhite" comprises Negro, Indian, Chinese, Japanese, Filipino, Hindu, Korean, or other nonwhite race, and persons of mixed white and nonwhite parentage.

**Persons per room.**—The number of persons per room, used as an index of crowding, has been computed for each occupied unit. The number of dwelling units classified as having more than one and one-half persons per room is shown for each area. All persons enumerated in the Population census as members of the household (including lodgers, servants, and other nonrelated persons) are counted in determining the number of persons that occupy each dwelling unit. The number of rooms in the dwelling unit includes all rooms avail-

able for use throughout the year. Bathrooms, closets, pantries, halls, screened porches, and unfinished rooms in the basement and attic are not counted as rooms.

**State of repair and plumbing equipment.**—Instructions to enumerators specified that dwelling units were to be classified as "needing major repairs" when repairs were needed on such parts of the structure as floors, roof, plaster, walls, or foundations, the continued neglect of which would impair the soundness of the structure and create a hazard to its safety as a place of residence. The data on state of repair are tabulated in combination with selected types of plumbing equipment and are therefore limited to dwelling units for which all of the various items in the combination were reported. In table 3 the phrase "needing major repairs" has been shortened to "needing repair" because of the space limitation.

**Contract or estimated rent.**—The average monthly rent or rental value of all dwelling units in each block is obtained by dividing the total amount of rent or estimated rental value reported by the number of dwelling units for which these items were reported. The enumerator was instructed to report for each tenant-occupied nonfarm dwelling unit the monthly contract rent, or, if no cash rent was paid, the estimated monthly rental value based on rents for similar dwelling units in the neighborhood; for each owner-occupied nonfarm dwelling unit, the owner's estimate of its monthly rental value; and for each vacant unit, the rent asked or the estimated rental value. The rental reported for a vacant seasonal dwelling unit represents the actual or estimated monthly amount charged for the unit during the portion of the year it is generally occupied; in resort areas, the average rent may be relatively high for this reason.

**Mortgage status.**—The mortgage data presented relate to owner-occupied nonfarm dwelling units in structures without business and containing not more than four dwelling units. Such a dwelling unit is classified as mortgaged if there is an indebtedness in the form of a mortgage, a deed of trust, or a land contract that is secured by it or by the property of which it is a part.

**Dwelling units reporting.**—All dwelling units are classified by occupancy and tenure, and all occupied units are classified by color of occupants. The corresponding percentage distributions shown for these items in table 1 are based on all dwelling units and all occupied units, respectively. For other subjects, such as state of repair and plumbing equipment, the percentages shown are based on the dwelling units for which specific characteristics are reported, that is, the total shown as "number reporting." The number of dwelling units for which the enumerator obtained no report on a particular item is shown for the city totals only; however, the corresponding figures can easily be derived for each area presented in tables 2 and 3 by subtracting the number reporting from the total number of dwelling units (or total occupied) shown for the area.

**Use of map—Block identification.**—Blocks are identified by serial numbers, a separate series of numbers being used for each "block area." Thus the location of each block for which data are presented in table 3 may be determined by referring to the appropriate area and block number shown on the map, which appears at the end of this Supplement. Similarly, data for a specific block may be readily located in the table if reference is made to the map for the identification numbers of the block and block area. The block areas are purely arbitrary subdivisions which have been established in order to facilitate the numbering of blocks in groups of less than 1,000. Totals for block areas are not shown because they serve only as a numbering device and have no significance for analytical purposes.

If no dwelling units are reported for a block, the block number is not listed in table 3, although it is shown on the map. Dwelling units for which the block number was not reported are indicated in the table by the symbol "NR." It will be noted that detailed data are not shown for such dwelling units, nor for blocks containing fewer than three dwelling units. All dwelling units are included, however, in the statistics for the city.

## BLOCK STATISTICS

### INTRODUCTION

#### GENERAL

The Supplements to the first series of Housing bulletins include a separate report for each of the 191 cities which in 1930 had a population of 50,000 or more. Each report presents for the city, by blocks, limited tabulations of data obtained in the Housing Census taken as of April 1, 1940, as a part of the Sixteenth Decennial Census of Population. Subjects presented include the number of residential structures; the number of dwelling units classified by occupancy and tenure, year built, color of occupants, number of persons per room, state of repair, and plumbing equipment; the average monthly rent or rental value of dwelling units; and the mortgage status of owner-occupied dwelling units.

Table 1 shows summary figures for the city. Table 2 contains the basic statistics for wards; this table is not shown in the bulletin for a city that is not divided into wards. Table 3 presents the data for blocks in numerical order within wards or block areas. A map showing the ward boundaries, as well as the location of each block, forms a part of the report.

**Related reports.**—The first series of Housing bulletins, which comprises a separate report for each State, presents limited tabulations of the housing data for the State, for urban, rural-nonfarm, and rural-farm areas of the State, for metropolitan districts, and for counties, incorporated places of 1,000 inhabitants or more, and minor civil divisions. The items shown for nonfarm dwelling units in these areas are the same as the items shown in the city Supplements, except that data on year built are not included in the first series bulletin for the State.

In the second series of Housing bulletins for States, more detailed statistics are presented for the State, for urban, rural-nonfarm, and rural-farm areas in the State, for counties, for rural-nonfarm and rural-farm parts of counties, for urban places, and for metropolitan districts. Additional topics covered by the second series include size of household, type of structure, exterior material, year built, number of rooms, lighting equipment, water supply, toilet facilities, bathtub or shower, radio, refrigeration equipment, cooking fuel, heating equipment, heating fuel, value of owner-occupied units, and, for tenant-occupied nonfarm units, gross monthly rent and inclusion of furniture in rent. The more significant items are shown separately for the various occupancy, tenure, and color groups.

The first series of Population bulletins, also issued by States, gives the total population for the State and counties, urban and rural areas in the State and in counties, minor civil divisions, incorporated places, wards of places of 5,000 inhabitants or more, census tracts, and metropolitan districts. Population statistics are not available for city blocks. The second series of Population bulletins presents, for areas similar to those outlined above for the second series Housing bulletins, statistics for the population classified by sex, age, race, nativity, school attendance, and last year of school completed; for the foreign born by citizenship and country of birth; and for the labor force by employment status, broad occupation groups, and selected industries.

**Use of the data for blocks.**—The tabulation of housing characteristics for areas as small as city blocks provides descriptive material of considerable value for technical studies of housing in the city. The statistics will be useful in compiling totals for special types of areas that may be defined to meet the requirements of individual investigators. Users of the data should bear in mind that in practically all cases the data for a given block represent the work of only one enumerator. Consequently, the qualitative housing characteristics are subject to a wider margin of error than is to be expected in the figures for tracts or wards, which represent returns made by a number of enumerators. This qualification applies particularly to the number of dwelling units reported as needing major repairs, since the enumeration of this item depended to a considerable extent upon the judgment of individual enumerators. The misinterpretation by one enumerator of instructions pertaining to a particular item may cause a significant bias in the statistics for a very small area, even though it would have a negligible effect upon the figures for larger areas. Occasional failure to indicate the correct block number for a significant number of dwelling units may also introduce errors into the block data.

#### DEFINITIONS OF TERMS AND EXPLANATIONS

**Dwelling unit.**—A dwelling unit is defined as the living quarters occupied by, or intended for occupancy by, one household. A dwelling unit may be a detached house; a tenement, flat, or apartment in a larger building (an apartment house, an apartment hotel, or a section of a hotel devoted entirely to apartment rather

than transient use); or a room in a structure primarily devoted to business or other nonresidential purposes. It may be a superintendent's living quarters in a public building, such as a courthouse or library; a watchman's living quarters in a factory, store, or warehouse; a chauffeur's living quarters in a garage; or a tourist cabin, trailer, railroad car, boat, tent, etc., if occupied by persons having no other place of residence.

All occupied dwelling units and vacant dwelling units in habitable structures, seasonal as well as ordinary, were included in the canvass for housing data, except the following special types of dwelling places: Hotels for transient guests, and similar places maintained by the Y. M. C. A. or kindred organizations; missions, cheap one-night lodginghouses; dormitories for students; nurses' homes; educational or religious institutions; military institutions; penal institutions; soldiers' homes; homes for orphans and for the aged, blind, deaf, infirm, or incurable; Civilian Conservation Corps camps; Coast Guard stations; and lumber camps, or railroad or other construction camps, in which the workers live in a common barracks. These special types of dwelling places were not considered as part of the housing market, and in general their exclusion is consistent with the exclusion of quasi-family groups from the statistics of private families, as in the 1930 report on families. Dwelling units occupied by officials or employees of such places (except on military reservations) are included in the Housing census if they constitute separate living quarters in a detached house or in a multifamily structure containing no persons enumerated as part of the institutional population. In the case of Government-owned dwelling units in United States military reservations, neither private living quarters for families of officers or employees nor barracks for enlisted men are included in the data presented for housing.

The fact that the premises occupied by hotel and institutional groups are excluded from the statistics presented for occupied dwelling units should be considered in comparisons of the statistics on population and housing for a given area. The population in institutions may account for a large proportion of the total population of a small area.

**Residential structure.**—A residential structure is a building that contains one or more dwelling units. Each single-family or two-family house, apartment house, or other residential building constitutes a separate structure. Each house in a block of three or more "row" houses is counted as a separate structure, but a building which contains only two attached dwelling units constitutes one two-family structure. A building designed for business or other nonresidential use was not enumerated unless it contained one or more dwelling units.

**Occupancy and tenure.**—Dwelling units are classified by occupancy and tenure into four groups: Owner-occupied; tenant-occupied; vacant, for sale or rent; and vacant, other (not for sale or rent). Dwelling units are classified as occupied if they were occupied at the time of enumeration by households enumerated in the Population census at their usual place of residence. A dwelling unit is owner-occupied if it is owned either wholly or in part by the head of the household or by some related member of his family living in the dwelling unit. All other occupied units are classified as tenant-occupied whether or not cash rent is actually paid for the living quarters. Rent-free quarters and living accommodations received in payment for services performed are thus included with the tenant-occupied units.

The group "vacant, for sale or rent" includes all vacant dwelling units available for occupancy, even though not actually offered in the housing market at the time of enumeration. Dwelling units in "boarded-up" structures are excluded if they were beyond repair. The percentage of all dwelling units in the city that were vacant and for sale or rent on April 1, 1940, as shown in table 1, represents what is commonly referred to as the vacancy ratio. The relatively small group classified as "Vacant, not for sale or rent" represents chiefly dwelling units neither occupied nor available for sale or rent at the time of enumeration because they were being held for absent households. While many of these are for seasonal use only, others are the usual place of residence of households for which population data were enumerated elsewhere and reallocated to the home district. Dwelling units occupied temporarily by nonresident households are also included in this category.

**Year built.** Dwelling units are classified according to the calendar year in which the building was completed. This refers to the original construction, not to any later remodeling, additions, reconstruction, or conversion.

**Color of occupants.**—Occupied dwelling units are classified by color of head of household, according to the definition used in the 1940 Census of Population. In this report two categories are presented, "white" and "nonwhite." The classification "White" includes persons of Mexican birth or ancestry who were not definitely Indian or of other nonwhite race. "Nonwhite" comprises Negro, Indian, Chinese, Japanese, Filipino, Hindu, Korean, or other nonwhite race, and persons of mixed white and nonwhite parentage.

**Persons per room.**—The number of persons per room, used as an index of crowding, has been computed for each occupied unit. The number of dwelling units classified as having more than one and one-half persons per room is shown for each area. All persons enumerated in the Population census as members of the household (including lodgers, servants, and other nonrelated persons) are counted in determining the number of persons that occupy each dwelling unit. The number of rooms in the dwelling unit includes all rooms avail-

able for use throughout the year. Bathrooms, closets, pantries, halls, screened porches, and unfinished rooms in the basement and attic are not counted as rooms.

**State of repair and plumbing equipment.**—Instructions to enumerators specified that dwelling units were to be classified as "needing major repairs" when repairs were needed on such parts of the structure as floors, roof, plaster, walls, or foundations, the continued neglect of which would impair the soundness of the structure and create a hazard to its safety as a place of residence. The data on state of repair are tabulated in combination with selected types of plumbing equipment and are therefore limited to dwelling units for which all of the various items in the combination were reported. In table 3 the phrase "needing major repairs" has been shortened to "needing repair" because of the space limitation.

**Contract or estimated rent.**—The average monthly rent or rental value of all dwelling units in each block is obtained by dividing the total amount of rent or estimated rental value reported by the number of dwelling units for which these items were reported. The enumerator was instructed to report for each tenant-occupied nonfarm dwelling unit the monthly contract rent, or, if no cash rent was paid, the estimated monthly rental value based on rents for similar dwelling units in the neighborhood; for each owner-occupied nonfarm dwelling unit, the owner's estimate of its monthly rental value; and for each vacant unit, the rent asked or the estimated rental value. The rental reported for a vacant seasonal dwelling unit represents the actual or estimated monthly amount charged for the unit during the portion of the year it is generally occupied; in resort areas, the average rent may be relatively high for this reason.

**Mortgage status.**—The mortgage data presented relate to owner-occupied nonfarm dwelling units in structures without business and containing not more than four dwelling units. Such a dwelling unit is classified as mortgaged if there is an indebtedness in the form of a mortgage, a deed of trust, or a land contract that is secured by it or by the property of which it is a part.

**Dwelling units reporting.**—All dwelling units are classified by occupancy and tenure, and all occupied units are classified by color of occupants. The corresponding percentage distributions shown for these items in table 1 are based on all dwelling units and all occupied units, respectively. For other subjects, such as state of repair and plumbing equipment, the percentages shown are based on the dwelling units for which specific characteristics are reported, that is, the total shown as "number reporting." The number of dwelling units for which the enumerator obtained no report on a particular item is shown for the city totals only; however, the corresponding figures can easily be derived for each area presented in tables 2 and 3 by subtracting the number reporting from the total number of dwelling units (or total occupied) shown for the area.

**Use of map.—Block identification.**—Blocks are identified by serial numbers, a separate series of numbers being used for each ward or for a group of wards. Thus the location of each block for which data are presented in table 3 may be determined by referring to the ward designation and block number shown on the map which appears at the end of this Supplement. Similarly, data for a specific block may be readily located in the table if reference is made to the map for the identification numbers of the ward and block.

In some instances "block-areas," which have been established to facilitate the numbering of blocks in groups of less than 1,000, cause a break in the sequence of block numbers within a ward. Where this occurs each part that is in a separate block area is distinguished on the map, and in the table the data are shown for blocks in numerical order within each block area section of the ward. Occasionally, when the boundary of a ward cuts through the middle of a block, separate segments of the block are identified on the map by suffix letters not shown on the table. For example, if block 46 is divided into two parts by a ward boundary, the northern part in ward 6 is shown on the map as block 46N, but in the table it is identified simply as block 46 in ward 6.

If no dwelling units are reported for a block, the block number is not listed in table 3, although it is shown on the map. Dwelling units for which the block number was not reported are indicated in the table by the symbol "NR." It will be noted that detailed data are not shown for such dwelling units, nor for blocks containing fewer than three dwelling units. All dwelling units are included, however, in the statistics for the city and for each ward.

## BLOCK STATISTICS

### INTRODUCTION

#### GENERAL

The Supplements to the first series of Housing bulletins include a separate report for each of the 191 cities which in 1930 had a population of 50,000 or more. Each report presents for the city, by blocks, limited tabulations of data obtained in the Housing Census taken as of April 1, 1940, as a part of the Sixteenth Decennial Census of Population. Subjects presented include the number of residential structures; the number of dwelling units classified by occupancy and tenure, year built, color of occupants, number of persons per room, state of repair, and plumbing equipment; the average monthly rent or rental value of dwelling units; and the mortgage status of owner-occupied dwelling units.

Table 1 shows summary figures for the city and table 2 contains the basic statistics for census tracts. Table 3 presents the data for blocks in numerical order within tracts. A map showing the boundary streets of the census tracts, as well as the location of each block, forms a part of the report.

**Related reports.**—The first series of Housing bulletins, which comprises a separate report for each State, presents limited tabulations of the housing data for the State, for urban, rural-nonfarm, and rural-farm areas of the State, for metropolitan districts, and for counties, incorporated places of 1,000 inhabitants or more, and minor civil divisions. The items shown for nonfarm dwelling units in these areas are the same as the items shown in the city Supplements, except that data on year built are not included in the first series bulletin for the State.

In the second series of Housing bulletins for States, more detailed statistics are presented for the State, for urban, rural-nonfarm, and rural-farm areas in the State, for counties, for rural-nonfarm and rural-farm parts of counties, for urban places, and for metropolitan districts. Additional topics covered by the second series include size of household, type of structure, exterior material, year built, number of rooms, lighting equipment, water supply, toilet facilities, bathtub or shower, radio, refrigeration equipment, cooking fuel, heating equipment, heating fuel, value of owner-occupied units, and, for tenant-occupied nonfarm units, gross monthly rent and inclusion of furniture in rent. The more significant items are shown separately for the various occupancy, tenure, and color groups.

The first series of Population bulletins, also issued by States, gives the total population for the State and counties, urban and rural areas in the State and in counties, minor civil divisions, incorporated places, wards of places of 5,000 inhabitants or more, census tracts, and metropolitan districts. Population statistics are not available for city blocks. The second series of Population bulletins presents, for areas similar to those outlined above for the second series Housing bulletins, statistics for the population classified by sex, age, race, nativity, school attendance, and last year of school completed; for the foreign born by citizenship and country of birth; and for the labor force by employment status, broad occupation groups, and selected industries.

The statistics presented in the second series of Population and Housing bulletins are shown for the city total and in some detail for the metropolitan district. For each tract city, however, a joint report on population and housing will be issued in which the more important subjects covered in the second series of tabulations will be presented for census tracts.

**Census tracts.**—Census tracts are small areas into which certain large cities have been subdivided for statistical and local administrative purposes, through cooperation with a local committee. In most cases the tracts are permanently established, so that comparisons may be made from census to census. The boundaries of tracts are established so as to include approximately equal numbers of inhabitants or equal areas; and each tract is designed to represent an area that is fairly homogeneous in population characteristics. Although the tracted areas of some cities extend into the suburbs, the data shown in this report are restricted to the tracts within the corporate limits of the city.

**Use of the data for blocks.**—The tabulation of housing characteristics for areas as small as city blocks provides descriptive material of considerable value for technical studies of housing in the city. The statistics will be useful in compiling totals for special types of areas that may be defined to meet the requirements of individual investigators. Users of the data should bear in mind that in practically all cases the data for a given

block represents the work of only one enumerator. Consequently, the qualitative housing characteristics are subject to a wider margin of error than is to be expected in the figures for tracts or wards, which represent returns made by a number of enumerators. This qualification applies particularly to the number of dwelling units reported as needing major repairs, since the enumeration of this item depended to a considerable extent upon the judgment of individual enumerators. The misinterpretation by one enumerator of instructions pertaining to a particular item may cause a significant bias in the statistics for a very small area, even though it would have a negligible effect upon the figures for larger areas. Occasional failure to indicate the correct block number for a significant number of dwelling units may also introduce errors into the block data.

### DEFINITIONS OF TERMS AND EXPLANATIONS

**Dwelling unit.**—A dwelling unit is defined as the living quarters occupied by, or intended for occupancy by, one household. A dwelling unit may be a detached house; a tenement, flat, or apartment in a larger building (an apartment house, an apartment hotel, or a section of a hotel devoted entirely to apartment rather than transient use); or a room in a structure primarily devoted to business or other nonresidential purposes. It may be a superintendent's living quarters in a public building, such as a courthouse or library; a watchman's living quarters in a factory, store, or warehouse; a chauffeur's living quarters in a garage; or a tourist cabin, trailer, railroad car, boat, tent, etc., if occupied by persons having no other place of residence.

All occupied dwelling units and vacant dwelling units in habitable structures, seasonal as well as ordinary, were included in the canvass for housing data, except the following special types of dwelling places: Hotels for transient guests, and similar places maintained by the Y. M. C. A. or kindred organizations; missions, cheap one-night lodging houses; dormitories for students; nurses' homes; educational or religious institutions; military institutions; penal institutions; soldiers' homes; homes for orphans and for the aged, blind, deaf, infirm, or incurable; Civilian Conservation Corps camps; Coast Guard stations; and lumber camps, or railroad or other construction camps, in which the workers live in a common barracks. These special types of dwelling places were not considered as part of the housing market, and in general their exclusion is consistent with the exclusion of quasi-family groups from the statistics of private families, as in the 1930 report on families. Dwelling units occupied by officials or employees of such places (except on military reservations) are included in the Housing census if they constitute separate living quarters in a detached house or in a multifamily structure containing no persons enumerated as part of the institutional population. In the case of Government-owned dwelling units in United States military reservations, neither private living quarters for families of officers or employees nor barracks for enlisted men are included in the data presented for housing.

The fact that the premises occupied by hotel and institutional groups are excluded from the statistics presented for occupied dwelling units should be considered in comparisons of the statistics on population and housing for a given area. The population in institutions may account for a large proportion of the total population of a small area.

**Residential structure.**—A residential structure is a building that contains one or more dwelling units. Each single-family or two-family house, apartment house, or other residential building constitutes a separate structure. Each house in a block of three or more "row" houses is counted as a separate structure, but a building which contains only two attached dwelling units constitutes one two-family structure. A building designed for business or other nonresidential use was not enumerated unless it contained one or more dwelling units.

**Occupancy and tenure.**—Dwelling units are classified by occupancy and tenure into four groups: Owner-occupied; tenant-occupied; vacant, for sale or rent; and vacant, other (not for sale or rent). Dwelling units are classified as occupied if they were occupied at the time of enumeration by households enumerated in the Population census at their usual place of residence. A dwelling unit is owner-occupied if it is owned either wholly or in part by the head of the household or by some related member of his family living in the dwelling unit. All other occupied units are classified as tenant-occupied whether or not cash rent is actually paid for the living quarters. Rent-free quarters and living accommodations received in payment for services performed are thus included with the tenant-occupied units.

The group "vacant, for sale or rent" includes all vacant dwelling units available for occupancy, even though not actually offered in the housing market at the time of enumeration. Dwelling units in "boarded-up" structures are excluded if they were beyond repair. The percentage of all dwelling units in the city that were vacant and for sale or rent on April 1, 1940, as shown in table 1, represents what is commonly referred to as the vacancy ratio. The relatively small group classified as "Vacant, not for sale or rent" represents chiefly dwelling units neither occupied nor available for sale or rent at the time of enumeration because they were being held for absent households. While many of these are for seasonal use only, others are the usual place of residence of households for which population data were enumerated elsewhere and reallocated to the home district. Dwelling units occupied temporarily by nonresident households are also included in this category.

**Year built.**—Dwelling units are classified according to the calendar year in which the building was completed. This refers to the original construction, not to

any later remodeling, additions, reconstruction, or conversion.

**Color of occupants.**—Occupied dwelling units are classified by color of head of household, according to the definition used in the 1940 Census of Population. In this report two categories are presented, "white" and "nonwhite." The classification "White" includes persons of Mexican birth or ancestry who were not definitely Indian or of other nonwhite race. "Nonwhite" comprises Negro, Indian, Chinese, Japanese, Filipino, Hindu, Korean, or other nonwhite race, and persons of mixed white and nonwhite parentage.

**Persons per room.**—The number of persons per room, used as an index of crowding, has been computed for each occupied unit. The number of dwelling units classified as having more than one and one-half persons per room is shown for each area. All persons enumerated in the Population census as members of the household (including lodgers, servants, and other nonrelated persons) are counted in determining the number of persons that occupy each dwelling unit. The number of rooms in the dwelling unit includes all rooms available for use throughout the year. Bathrooms, closets, pantries, halls, screened porches, and unfinished rooms in the basement and attic are not counted as rooms.

**State of repair and plumbing equipment.**—Instructions to enumerators specified that dwelling units were to be classified as "needing major repairs" when repairs were needed on such parts of the structure as floors, roof, plaster, walls, or foundations, the continued neglect of which would impair the soundness of the structure and create a hazard to its safety as a place of residence. The data on state of repair are tabulated in combination with selected types of plumbing equipment and are therefore limited to dwelling units for which all of the various items in the combination were reported. In table 3 the phrase "needing major repairs" has been shortened to "needing repair" because of the space limitation.

**Contract or estimated rent.**—The average monthly rent or rental value of all dwelling units in each block is obtained by dividing the total amount of rent or estimated rental value reported by the number of dwelling units for which these items were reported. The enumerator was instructed to report for each tenant-occupied nonfarm dwelling unit the monthly contract rent, or, if no cash rent was paid, the estimated monthly rental value based on rents for similar dwelling units in the neighborhood; for each owner-occupied nonfarm dwelling unit, the owner's estimate of its monthly rental value; and for each vacant unit, the rent asked or the estimated rental value. The rental reported for a vacant seasonal dwelling unit represents the actual or estimated monthly amount charged for the unit during the portion of the year it is generally occupied; in resort areas, the average rent may be relatively high for this reason.

**Mortgage status.**—The mortgage data presented relate to owner-occupied nonfarm dwelling units in structures without business and containing not more than four dwelling units. Such a dwelling unit is classified as mortgaged if there is an indebtedness in the form of a mortgage, a deed of trust, or a land contract that is secured by it or by the property of which it is a part.

**Dwelling units reporting.**—All dwelling units are classified by occupancy and tenure, and all occupied units are classified by color of occupants. The corresponding percentage distributions shown for these items in table 1 are based on all dwelling units and all occupied units, respectively. For other subjects, such as state of repair and plumbing equipment, the percentages shown are based on the dwelling units for which specific characteristics are reported, that is, the total shown as "number reporting." The number of dwelling units for which the enumerator obtained no report on a particular item is shown for the city totals only; however, the corresponding figures can easily be derived for each area presented in tables 2 and 3 by subtracting the number reporting from the total number of dwelling units (or total occupied) shown for the area.

**Use of map—Block identification.**—Blocks are identified by serial numbers, a separate series of numbers being used for each tract. Thus, the location of each block for which data are presented in table 3 may be determined by referring to the tract designation and block number shown on the map which is presented in this Supplement. Similarly, data for a specific block or group of blocks may be readily located in the table if reference is made to the map for the tract designation and block number.

If no dwelling units are reported for a block, the block number is not listed in table 3, although it is shown on the map. Dwelling units for which the block number was not reported are indicated in the table by the symbol "NR." It will be noted that detailed data are not shown for such dwelling units, nor for blocks containing fewer than three dwelling units. However, all dwelling units are included in the combined statistics for the city and for each tract.

## BLOCK STATISTICS

### INTRODUCTION

#### GENERAL

The Supplements to the first series of Housing bulletins include a separate report for each of the 191 cities which in 1930 had a population of 50,000 or more. Each report presents for the city, by blocks, limited tabulations of data obtained in the Housing Census taken as of April 1, 1940, as a part of the Sixteenth Decennial Census of Population. Subjects presented include the number of residential structures; the number of dwelling units classified by occupancy and tenure, year built, color of occupants, number of persons per room, state of repair, and plumbing equipment; the average monthly rent or rental value of dwelling units; and the mortgage status of owner-occupied dwelling units.

Table 1 shows summary figures for the city. Table 2 contains the basic statistics for wards; this table is not shown in the bulletin for a city that is not divided into wards. Table 3 presents the data for blocks in numerical order within wards or block areas. A map showing the ward boundaries, as well as the location of each block, forms a part of the report.

**Related reports.**—The first series of Housing bulletins, which comprises a separate report for each State, presents limited tabulations of the housing data for the State, for urban, rural-nonfarm, and rural-farm areas of the State, for metropolitan districts, and for counties, incorporated places of 1,000 inhabitants or more, and minor civil divisions. The items shown for nonfarm dwelling units in these areas are the same as the items shown in the city Supplements, except that data on year built are not included in the first series bulletin for the State.

In the second series of Housing bulletins for States, more detailed statistics are presented for the State, for urban, rural-nonfarm, and rural-farm areas in the State, for counties, for rural-nonfarm and rural-farm parts of counties, for urban places, and for metropolitan districts. Additional topics covered by the second series include size of household, type of structure, exterior material, year built, number of rooms, lighting equipment, water supply, toilet facilities, bathtub or shower, radio, refrigeration equipment, cooking fuel, heating equipment, heating fuel, value of owner-occupied units, and, for tenant-occupied nonfarm units, gross monthly rent and inclusion of furniture in rent. The more significant items are shown separately for the various occupancy, tenure, and color groups.

The first series of Population bulletins, also issued by States, gives the total population for the State and counties, urban and rural areas in the State and in counties, minor civil divisions, incorporated places, wards of places of 5,000 inhabitants or more, census tracts, and metropolitan districts. Population statistics are not available for city blocks. The second series of Population bulletins presents, for areas similar to those outlined above for the second series Housing bulletins, statistics for the population classified by sex, age, race, nativity, school attendance, and last year of school completed; for the foreign born by citizenship and country of birth; and for the labor force by employment status, broad occupation groups, and selected industries.

**Use of the data for blocks.**—The tabulation of housing characteristics for areas as small as city blocks provides descriptive material of considerable value for technical studies of housing in the city. The statistics will be useful in compiling totals for special types of areas that may be defined to meet the requirements of individual investigators. Users of the data should bear in mind that in practically all cases the data for a given block represent the work of only one enumerator. Consequently, the qualitative housing characteristics are subject to a wider margin of error than is to be expected in the figures for tracts or wards, which represent returns made by a number of enumerators. This qualification applies particularly to the number of dwelling units reported as needing major repairs, since the enumeration of this item depended to a considerable extent upon the judgment of individual enumerators. The misinterpretation by one enumerator of instructions pertaining to a particular item may cause a significant bias in the statistics for a very small area, even though it would have a negligible effect upon the figures for larger areas. Occasional failure to indicate the correct block number for a significant number of dwelling units may also introduce errors into the block data.

#### DEFINITIONS OF TERMS AND EXPLANATIONS

**Dwelling unit.**—A dwelling unit is defined as the living quarters occupied by, or intended for occupancy by, one household. A dwelling unit may be a detached house; a tenement, flat, or apartment in a larger building (an apartment house, an apartment hotel, or a section of a hotel devoted entirely to apartment rather

than transient use); or a room in a structure primarily devoted to business or other nonresidential purposes. It may be a superintendent's living quarters in a public building, such as a courthouse or library; a watchman's living quarters in a factory, store, or warehouse; a chauffeur's living quarters in a garage; or a tourist cabin, trailer, railroad car, boat, tent, etc., if occupied by persons having no other place of residence.

All occupied dwelling units and vacant dwelling units in habitable structures, seasonal as well as ordinary, were included in the canvass for housing data, except the following special types of dwelling places: Hotels for transient guests, and similar places maintained by the Y. M. C. A. or kindred organizations; missions, cheap one-night lodginghouses; dormitories for students; nurses' homes; educational or religious institutions; military institutions; penal institutions; soldiers' homes; homes for orphans and for the aged, blind, deaf, infirm, or incurable; Civilian Conservation Corps camps; Coast Guard stations; and lumber camps, or railroad or other construction camps, in which the workers live in a common barracks. These special types of dwelling places were not considered as part of the housing market, and in general their exclusion is consistent with the exclusion of quasi-family groups from the statistics of private families, as in the 1930 report on families. Dwelling units occupied by officials or employees of such places (except on military reservations) are included in the Housing census if they constitute separate living quarters in a detached house or in a multifamily structure containing no persons enumerated as part of the institutional population. In the case of Government-owned dwelling units in United States military reservations, neither private living quarters for families of officers or employees nor barracks for enlisted men are included in the data presented for housing.

The fact that the premises occupied by hotel and institutional groups are excluded from the statistics presented for occupied dwelling units should be considered in comparisons of the statistics on population and housing for a given area. The population in institutions may account for a large proportion of the total population of a small area.

**Residential structure.**—A residential structure is a building that contains one or more dwelling units. Each single-family or two-family house, apartment house, or other residential building constitutes a separate structure. Each house in a block of three or more "row" houses is counted as a separate structure, but a building which contains only two attached dwelling units constitutes one two-family structure. A building designed for business or other nonresidential use was not enumerated unless it contained one or more dwelling units.

**Occupancy and tenure.**—Dwelling units are classified by occupancy and tenure into four groups: Owner-occupied; tenant-occupied; vacant, for sale or rent; and vacant, other (not for sale or rent). Dwelling units are classified as occupied if they were occupied at the time of enumeration by households enumerated in the Population census at their usual place of residence. A dwelling unit is owner-occupied if it is owned either wholly or in part by the head of the household or by some related member of his family living in the dwelling unit. All other occupied units are classified as tenant-occupied whether or not cash rent is actually paid for the living quarters. Rent-free quarters and living accommodations received in payment for services performed are thus included with the tenant-occupied units.

The group "vacant, for sale or rent" includes all vacant dwelling units available for occupancy, even though not actually offered in the housing market at the time of enumeration. Dwelling units in "boarded-up" structures are excluded if they were beyond repair. The percentage of all dwelling units in the city that were vacant and for sale or rent on April 1, 1940, as shown in table 1, represents what is commonly referred to as the vacancy ratio. The relatively small group classified as "Vacant, not for sale or rent" represents chiefly dwelling units neither occupied nor available for sale or rent at the time of enumeration because they were being held for absent households. While many of these are for seasonal use only, others are the usual place of residence of households for which population data were enumerated elsewhere and reallocated to the home district. Dwelling units occupied temporarily by nonresident households are also included in this category.

**Year built.**—Dwelling units are classified according to the calendar year in which the building was completed. This refers to the original construction, not to any later remodeling, additions, reconstruction, or conversion.

**Color of occupants.**—Occupied dwelling units are classified by color of head of household, according to the definition used in the 1940 Census of Population. In this report two categories are presented, "white" and "nonwhite." The classification "White" includes persons of Mexican birth or ancestry who were not definitely Indian or of other nonwhite race. "Nonwhite" comprises Negro, Indian, Chinese, Japanese, Filipino, Hindu, Korean, or other nonwhite race, and persons of mixed white and nonwhite parentage.

**Persons per room.**—The number of persons per room, used as an index of crowding, has been computed for each occupied unit. The number of dwelling units classified as having more than one and one-half persons per room is shown for each area. All persons enumerated in the Population census as members of the household (including lodgers, servants, and other nonrelated persons) are counted in determining the number of persons that occupy each dwelling unit. The number of rooms in the dwelling unit includes all rooms avail-

able for use throughout the year. Bathrooms, closets, pantries, halls, screened porches, and unfinished rooms in the basement and attic are not counted as rooms.

**State of repair and plumbing equipment.**—Instructions to enumerators specified that dwelling units were to be classified as "needing major repairs" when repairs were needed on such parts of the structure as floors, roof, plaster, walls, or foundations, the continued neglect of which would impair the soundness of the structure and create a hazard to its safety as a place of residence. The data on state of repair are tabulated in combination with selected types of plumbing equipment and are therefore limited to dwelling units for which all of the various items in the combination were reported. In table 3 the phrase "needing major repairs" has been shortened to "needing repair" because of the space limitation.

**Contract or estimated rent.**—The average monthly rent or rental value of all dwelling units in each block is obtained by dividing the total amount of rent or estimated rental value reported by the number of dwelling units for which these items were reported. The enumerator was instructed to report for each tenant-occupied nonfarm dwelling unit the monthly contract rent, or, if no cash rent was paid, the estimated monthly rental value based on rents for similar dwelling units in the neighborhood; for each owner-occupied nonfarm dwelling unit, the owner's estimate of its monthly rental value; and for each vacant unit, the rent asked or the estimated rental value. The rental reported for a vacant seasonal dwelling unit represents the actual or estimated monthly amount charged for the unit during the portion of the year it is generally occupied; in resort areas, the average rent may be relatively high for this reason.

**Mortgage status.**—The mortgage data presented relate to owner-occupied nonfarm dwelling units in structures without business and containing not more than four dwelling units. Such a dwelling unit is classified as mortgaged if there is an indebtedness in the form of a mortgage, a deed of trust, or a land contract that is secured by it or by the property of which it is a part.

**Dwelling units reporting.**—All dwelling units are classified by occupancy and tenure, and all occupied units are classified by color of occupants. The corresponding percentage distributions shown for these items in table 1 are based on all dwelling units and all occupied units, respectively. For other subjects, such as state of repair and plumbing equipment, the percentages shown are based on the dwelling units for which specific characteristics are reported, that is, the total shown as "number reporting." The number of dwelling units for which the enumerator obtained no report on a particular item is shown for the city totals only; however, the corresponding figures can easily be derived for each area presented in tables 2 and 3 by subtracting the number reporting from the total number of dwelling units (or total occupied) shown for the area.

**Use of map.—Block identification.**—Blocks are identified by serial numbers, a separate series of numbers being used for each ward or for a group of wards. Thus the location of each block for which data are presented in table 3 may be determined by referring to the ward designation and block number shown on the map which appears at the end of this Supplement. Similarly, data for a specific block may be readily located in the table if reference is made to the map for the identification numbers of the ward and block.

In some instances "block-areas," which have been established to facilitate the numbering of blocks in groups of less than 1,000, cause a break in the sequence of block numbers within a ward. Where this occurs each part that is in a separate block area is distinguished on the map, and in the table the data are shown for blocks in numerical order within each block area section of the ward. Occasionally, when the boundary of a ward cuts through the middle of a block, separate segments of the block are identified on the map by suffix letters not shown on the table. For example, if block 46 is divided into two parts by a ward boundary, the northern part in ward 6 is shown on the map as block 46N, but in the table it is identified simply as block 46 in ward 6.

If no dwelling units are reported for a block, the block number is not listed in table 3, although it is shown on the map. Dwelling units for which the block number was not reported are indicated in the table by the symbol "NR." It will be noted that detailed data are not shown for such dwelling units, nor for blocks containing fewer than three dwelling units. All dwelling units are included, however, in the statistics for the city and for each ward.

## BLOCK STATISTICS

## INTRODUCTION

### GENERAL

The Supplements to the first series of Housing bulletins include a separate report for each of the 191 cities which in 1930 had a population of 50,000 or more. Each report presents for the city, by blocks, limited tabulations of data obtained in the Housing Census taken as of April 1, 1940, as a part of the Sixteenth Decennial Census of Population. Subjects presented include the number of residential structures; the number of dwelling units classified by occupancy and tenure, year built, color of occupants, number of persons per room, state of repair, and plumbing equipment; the average monthly rent or rental value of dwelling units; and the mortgage status of owner-occupied dwelling units.

Table 1 shows summary figures for the city and table 2 contains the basic statistics for census tracts. Table 3 presents the data for blocks in numerical order within tracts. A map showing the boundary streets of the census tracts, as well as the location of each block, forms a part of the report.

**Related reports.**—The first series of Housing bulletins, which comprises a separate report for each State, presents limited tabulations of the housing data for the State, for urban, rural-nonfarm, and rural-farm areas of the State, for metropolitan districts, and for counties, incorporated places of 1,000 inhabitants or more, and minor civil divisions. The items shown for nonfarm dwelling units in these areas are the same as the items shown in the city Supplements, except that data on year built are not included in the first series bulletin for the State.

In the second series of Housing bulletins for States, more detailed statistics are presented for the State, for urban, rural-nonfarm, and rural-farm areas in the State, for counties, for rural-nonfarm and rural-farm parts of counties, for urban places, and for metropolitan districts. Additional topics covered by the second series include size of household, type of structure, exterior material, year built, number of rooms, lighting equipment, water supply, toilet facilities, bathtub or shower, radio, refrigeration equipment, cooking fuel, heating equipment, heating fuel, value of owner-occupied units, and, for tenant-occupied nonfarm units, gross monthly rent and inclusion of furniture in rent. The more significant items are shown separately for the various occupancy, tenure, and color groups.

The first series of Population bulletins, also issued by States, gives the total population for the State and counties, urban and rural areas in the State and in counties, minor civil divisions, incorporated places, wards of places of 5,000 inhabitants or more, census tracts, and metropolitan districts. Population statistics are not available for city blocks. The second series of Population bulletins presents, for areas similar to those outlined above for the second series Housing bulletins, statistics for the population classified by sex, age, race, nativity, school attendance, and last year of school completed; for the foreign born by citizenship and country of birth; and for the labor force by employment status, broad occupation groups, and selected industries.

The statistics presented in the second series of Population and Housing bulletins are shown for the city total and in some detail for the metropolitan district. For each tract city, however, a joint report on population and housing will be issued in which the more important subjects covered in the second series of tabulations will be presented for census tracts.

**Census tracts.**—Census tracts are small areas into which certain large cities have been subdivided for statistical and local administrative purposes, through cooperation with a local committee. In most cases the tracts are permanently established, so that comparisons may be made from census to census. The boundaries of tracts are established so as to include approximately equal numbers of inhabitants or equal areas; and each tract is designed to represent an area that is fairly homogeneous in population characteristics. Although the tracted areas of some cities extend into the suburbs, the data shown in this report are restricted to the tracts within the corporate limits of the city.

**Use of the data for blocks.**—The tabulation of housing characteristics for areas as small as city blocks provides descriptive material of considerable value for technical studies of housing in the city. The statistics will be useful in compiling totals for special types of areas that may be defined to meet the requirements of individual investigators. Users of the data should bear in mind that in practically all cases the data for a given

block represents the work of only one enumerator. Consequently, the qualitative housing characteristics are subject to a wider margin of error than is to be expected in the figures for tracts or wards, which represent returns made by a number of enumerators. This qualification applies particularly to the number of dwelling units reported as needing major repairs, since the enumeration of this item depended to a considerable extent upon the judgment of individual enumerators. The misinterpretation by one enumerator of instructions pertaining to a particular item may cause a significant bias in the statistics for a very small area, even though it would have a negligible effect upon the figures for larger areas. Occasional failure to indicate the correct block number for a significant number of dwelling units may also introduce errors into the block data.

### DEFINITIONS OF TERMS AND EXPLANATIONS

**Dwelling unit.**—A dwelling unit is defined as the living quarters occupied by, or intended for occupancy by, one household. A dwelling unit may be a detached house; a tenement, flat, or apartment in a larger building (an apartment house, an apartment hotel, or a section of a hotel devoted entirely to apartment rather than transient use); or a room in a structure primarily devoted to business or other nonresidential purposes. It may be a superintendent's living quarters in a public building, such as a courthouse or library; a watchman's living quarters in a factory, store, or warehouse; a chauffeur's living quarters in a garage; or a tourist cabin, trailer, railroad car, boat, tent, etc., if occupied by persons having no other place of residence.

All occupied dwelling units and vacant dwelling units in habitable structures, seasonal as well as ordinary, were included in the canvass for housing data, except the following special types of dwelling places: Hotels for transient guests, and similar places maintained by the Y. M. C. A. or kindred organizations; missions, cheap one-night lodging houses; dormitories for students; nurses' homes; educational or religious institutions; military institutions; penal institutions; soldiers' homes; homes for orphans and for the aged, blind, deaf, infirm, or incurable; Civilian Conservation Corps camps; Coast Guard stations; and lumber camps, or railroad or other construction camps, in which the workers live in a common barracks. These special types of dwelling places were not considered as part of the housing market, and in general their exclusion is consistent with the exclusion of quasi-family groups from the statistics of private families, as in the 1930 report on families. Dwelling units occupied by officials or employees of such places (except on military reservations) are included in the Housing census if they constitute separate living quarters in a detached house or in a multifamily structure containing no persons enumerated as part of the institutional population. In the case of Government-owned dwelling units in United States military reservations, neither private living quarters for families of officers or employees nor barracks for enlisted men are included in the data presented for housing.

The fact that the premises occupied by hotel and institutional groups are excluded from the statistics presented for occupied dwelling units should be considered in comparisons of the statistics on population and housing for a given area. The population in institutions may account for a large proportion of the total population of a small area.

**Residential structure.**—A residential structure is a building that contains one or more dwelling units. Each single-family or two-family house, apartment house, or other residential building constitutes a separate structure. Each house in a block of three or more "row" houses is counted as a separate structure, but a building which contains only two attached dwelling units constitutes one two-family structure. A building designed for business or other nonresidential use was not enumerated unless it contained one or more dwelling units.

**Occupancy and tenure.**—Dwelling units are classified by occupancy and tenure into four groups: Owner-occupied; tenant-occupied; vacant, for sale or rent; and vacant, other (not for sale or rent). Dwelling units are classified as occupied if they were occupied at the time of enumeration by households enumerated in the Population census at their usual place of residence. A dwelling unit is owner-occupied if it is owned either wholly or in part by the head of the household or by some related member of his family living in the dwelling unit. All other occupied units are classified as tenant-occupied whether or not cash rent is actually paid for the living quarters. Rent-free quarters and living accommodations received in payment for services performed are thus included with the tenant-occupied units.

The group "vacant, for sale or rent" includes all vacant dwelling units available for occupancy, even though not actually offered in the housing market at the time of enumeration. Dwelling units in "boarded-up" structures are excluded if they were beyond repair. The percentage of all dwelling units in the city that were vacant and for sale or rent on April 1, 1940, as shown in table 1, represents what is commonly referred to as the vacancy ratio. The relatively small group classified as "Vacant, not for sale or rent" represents chiefly dwelling units neither occupied nor available for sale or rent at the time of enumeration because they were being held for absent households. While many of these are for seasonal use only, others are the usual place of residence of households for which population data were enumerated elsewhere and reallocated to the home district. Dwelling units occupied temporarily by nonresident households are also included in this category.

**Year built.**—Dwelling units are classified according to the calendar year in which the building was completed. This refers to the original construction, not to

any later remodeling, additions, reconstruction, or conversion.

**Color of occupants.**—Occupied dwelling units are classified by color of head of household, according to the definition used in the 1940 Census of Population. In this report two categories are presented, "white" and "nonwhite." The classification "White" includes persons of Mexican birth or ancestry who were not definitely Indian or of other nonwhite race. "Nonwhite" comprises Negro, Indian, Chinese, Japanese, Filipino, Hindu, Korean, or other nonwhite race, and persons of mixed white and nonwhite parentage.

**Persons per room.**—The number of persons per room, used as an index of crowding, has been computed for each occupied unit. The number of dwelling units classified as having more than one and one-half persons per room is shown for each area. All persons enumerated in the Population census as members of the household (including lodgers, servants, and other nonrelated persons) are counted in determining the number of persons that occupy each dwelling unit. The number of rooms in the dwelling unit includes all rooms available for use throughout the year. Bathrooms, closets, pantries, halls, screened porches, and unfinished rooms in the basement and attic are not counted as rooms.

**State of repair and plumbing equipment.**—Instructions to enumerators specified that dwelling units were to be classified as "needing major repairs" when repairs were needed on such parts of the structure as floors, roof, plaster, walls, or foundations, the continued neglect of which would impair the soundness of the structure and create a hazard to its safety as a place of residence. The data on state of repair are tabulated in combination with selected types of plumbing equipment and are therefore limited to dwelling units for which all of the various items in the combination were reported. In table 3 the phrase "needing major repairs" has been shortened to "needing repair" because of the space limitation.

**Contract or estimated rent.**—The average monthly rent or rental value of all dwelling units in each block is obtained by dividing the total amount of rent or estimated rental value reported by the number of dwelling units for which these items were reported. The enumerator was instructed to report for each tenant-occupied nonfarm dwelling unit the monthly contract rent, or, if no cash rent was paid, the estimated monthly rental value based on rents for similar dwelling units in the neighborhood; for each owner-occupied nonfarm dwelling unit, the owner's estimate of its monthly rental value; and for each vacant unit, the rent asked or the estimated rental value. The rental reported for a vacant seasonal dwelling unit represents the actual or estimated monthly amount charged for the unit during the portion of the year it is generally occupied; in resort areas, the average rent may be relatively high for this reason.

**Mortgage status.**—The mortgage data presented relate to owner-occupied nonfarm dwelling units in structures without business and containing not more than four dwelling units. Such a dwelling unit is classified as mortgaged if there is an indebtedness in the form of a mortgage, a deed of trust, or a land contract that is secured by it or by the property of which it is a part.

**Dwelling units reporting.**—All dwelling units are classified by occupancy and tenure, and all occupied units are classified by color of occupants. The corresponding percentage distributions shown for these items in table 1 are based on all dwelling units and all occupied units, respectively. For other subjects, such as state of repair and plumbing equipment, the percentages shown are based on the dwelling units for which specific characteristics are reported, that is, the total shown as "number reporting." The number of dwelling units for which the enumerator obtained no report on a particular item is shown for the city totals only; however, the corresponding figures can easily be derived for each area presented in tables 2 and 3 by subtracting the number reporting from the total number of dwelling units (or total occupied) shown for the area.

**Use of map—Block identification.**—Blocks are identified by serial numbers, a separate series of numbers being used for each tract. Thus, the location of each block for which data are presented in table 3 may be determined by referring to the tract designation and block number shown on the map which is presented in this Supplement. Similarly, data for a specific block or group of blocks may be readily located in the table if reference is made to the map for the tract designation and block number.

If no dwelling units are reported for a block, the block number is not listed in table 3, although it is shown on the map. Dwelling units for which the block number was not reported are indicated in the table by the symbol "NR." It will be noted that detailed data are not shown for such dwelling units, nor for blocks containing fewer than three dwelling units. However, all dwelling units are included in the combined statistics for the city and for each tract.

## BLOCK STATISTICS

### INTRODUCTION

#### GENERAL

The Supplements to the first series of Housing bulletins include a separate report for each of the 191 cities which in 1930 had a population of 50,000 or more. Each report presents for the city, by blocks, limited tabulations of data obtained in the Housing Census taken as of April 1, 1940, as a part of the Sixteenth Decennial Census of Population. Subjects presented include the number of residential structures; the number of dwelling units classified by occupancy and tenure, year built, color of occupants, number of persons per room, state of repair, and plumbing equipment; the average monthly rent or rental value of dwelling units; and the mortgage status of owner-occupied dwelling units.

Table 1 shows summary figures for the city and table 2 contains the basic statistics for census tracts. Table 3 presents the data for blocks in numerical order within tracts. A map showing the boundary streets of the census tracts, as well as the location of each block, forms a part of the report.

**Related reports.**—The first series of Housing bulletins, which comprises a separate report for each State, presents limited tabulations of the housing data for the State, for urban, rural-nonfarm, and rural-farm areas of the State, for metropolitan districts, and for counties, incorporated places of 1,000 inhabitants or more, and minor civil divisions. The items shown for nonfarm dwelling units in these areas are the same as the items shown in the city Supplements, except that data on year built are not included in the first series bulletin for the State.

In the second series of Housing bulletins for States, more detailed statistics are presented for the State, for urban, rural-nonfarm, and rural-farm areas in the State, for counties, for rural-nonfarm and rural-farm parts of counties, for urban places, and for metropolitan districts. Additional topics covered by the second series include size of household, type of structure, exterior material, year built, number of rooms, lighting equipment, water supply, toilet facilities, bathtub or shower, radio, refrigeration equipment, cooking fuel, heating equipment, heating fuel, value of owner-occupied units, and, for tenant-occupied nonfarm units, gross monthly rent and inclusion of furniture in rent. The more significant items are shown separately for the various occupancy, tenure, and color groups.

The first series of Population bulletins, also issued by States, gives the total population for the State and counties, urban and rural areas in the State and in counties, minor civil divisions, incorporated places, wards of places of 5,000 inhabitants or more, census tracts, and metropolitan districts. Population statistics are not available for city blocks. The second series of Population bulletins presents, for areas similar to those outlined above for the second series Housing bulletins, statistics for the population classified by sex, age, race, nativity, school attendance, and last year of school completed; for the foreign born by citizenship and country of birth; and for the labor force by employment status, broad occupation groups, and selected industries.

The statistics presented in the second series of Population and Housing bulletins are shown for the city total and in some detail for the metropolitan district. For each tract city, however, a joint report on population and housing will be issued in which the more important subjects covered in the second series of tabulations will be presented for census tracts.

**Census tracts.**—Census tracts are small areas into which certain large cities have been subdivided for statistical and local administrative purposes, through cooperation with a local committee. In most cases the tracts are permanently established, so that comparisons may be made from census to census. The boundaries of tracts are established so as to include approximately equal numbers of inhabitants or equal areas; and each tract is designed to represent an area that is fairly homogeneous in population characteristics. Although the tracted areas of some cities extend into the suburbs, the data shown in this report are restricted to the tracts within the corporate limits of the city.

**Use of the data for blocks.**—The tabulation of housing characteristics for areas as small as city blocks provides descriptive material of considerable value for technical studies of housing in the city. The statistics will be useful in compiling totals for special types of areas that may be defined to meet the requirements of individual investigators. Users of the data should bear in mind that in practically all cases the data for a given

block represents the work of only one enumerator. Consequently, the qualitative housing characteristics are subject to a wider margin of error than is to be expected in the figures for tracts or wards, which represent returns made by a number of enumerators. This qualification applies particularly to the number of dwelling units reported as needing major repairs, since the enumeration of this item depended to a considerable extent upon the judgment of individual enumerators. The misinterpretation by one enumerator of instructions pertaining to a particular item may cause a significant bias in the statistics for a very small area, even though it would have a negligible effect upon the figures for larger areas. Occasional failure to indicate the correct block number for a significant number of dwelling units may also introduce errors into the block data.

### DEFINITIONS OF TERMS AND EXPLANATIONS

**Dwelling unit.**—A dwelling unit is defined as the living quarters occupied by, or intended for occupancy by, one household. A dwelling unit may be a detached house; a tenement, flat, or apartment in a larger building (an apartment house, an apartment hotel, or a section of a hotel devoted entirely to apartment rather than transient use); or a room in a structure primarily devoted to business or other nonresidential purposes. It may be a superintendent's living quarters in a public building, such as a courthouse or library; a watchman's living quarters in a factory, store, or warehouse; a chauffeur's living quarters in a garage; or a tourist cabin, trailer, railroad car, boat, tent, etc., if occupied by persons having no other place of residence.

All occupied dwelling units and vacant dwelling units in habitable structures, seasonal as well as ordinary, were included in the canvass for housing data, except the following special types of dwelling places: Hotels for transient guests, and similar places maintained by the Y. M. C. A. or kindred organizations; missions, cheap one-night lodging houses; dormitories for students; nurses' homes; educational or religious institutions; military institutions; penal institutions; soldiers' homes; homes for orphans and for the aged, blind, deaf, infirm, or incurable; Civilian Conservation Corps camps; Coast Guard stations; and lumber camps, or railroad or other construction camps, in which the workers live in a common barracks. These special types of dwelling places were not considered as part of the housing market, and in general their exclusion is consistent with the exclusion of quasi-family groups from the statistics of private families, as in the 1930 report on families. Dwelling units occupied by officials or employees of such places (except on military reservations) are included in the Housing census if they constitute separate living quarters in a detached house or in a multifamily structure containing no persons enumerated as part of the institutional population. In the case of Government-owned dwelling units in United States military reservations, neither private living quarters for families of officers or employees nor barracks for enlisted men are included in the data presented for housing.

The fact that the premises occupied by hotel and institutional groups are excluded from the statistics presented for occupied dwelling units should be considered in comparisons of the statistics on population and housing for a given area. The population in institutions may account for a large proportion of the total population of a small area.

**Residential structure.**—A residential structure is a building that contains one or more dwelling units. Each single-family or two-family house, apartment house, or other residential building constitutes a separate structure. Each house in a block of three or more "row" houses is counted as a separate structure, but a building which contains only two attached dwelling units constitutes one two-family structure. A building designed for business or other nonresidential use was not enumerated unless it contained one or more dwelling units.

**Occupancy and tenure.**—Dwelling units are classified by occupancy and tenure into four groups: Owner-occupied; tenant-occupied; vacant, for sale or rent; and vacant, other (not for sale or rent). Dwelling units are classified as occupied if they were occupied at the time of enumeration by households enumerated in the Population census at their usual place of residence. A dwelling unit is owner-occupied if it is owned either wholly or in part by the head of the household or by some related member of his family living in the dwelling unit. All other occupied units are classified as tenant-occupied whether or not cash rent is actually paid for the living quarters. Rent-free quarters and living accommodations received in payment for services performed are thus included with the tenant-occupied units.

The group "vacant, for sale or rent" includes all vacant dwelling units available for occupancy, even though not actually offered in the housing market at the time of enumeration. Dwelling units in "boarded-up" structures are excluded if they were beyond repair. The percentage of all dwelling units in the city that were vacant and for sale or rent on April 1, 1940, as shown in table 1, represents what is commonly referred to as the vacancy ratio. The relatively small group classified as "Vacant, not for sale or rent" represents chiefly dwelling units neither occupied nor available for sale or rent at the time of enumeration because they were being held for absent households. While many of these are for seasonal use only, others are the usual place of residence of households for which population data were enumerated elsewhere and reallocated to the home district. Dwelling units occupied temporarily by nonresident households are also included in this category.

**Year built.**—Dwelling units are classified according to the calendar year in which the building was completed. This refers to the original construction, not to

any later remodeling, additions, reconstruction, or conversion.

**Color of occupants.**—Occupied dwelling units are classified by color of head of household, according to the definition used in the 1940 Census of Population. In this report two categories are presented, "white" and "nonwhite." The classification "White" includes persons of Mexican birth or ancestry who were not definitely Indian or of other nonwhite race. "Nonwhite" comprises Negro, Indian, Chinese, Japanese, Filipino, Hindu, Korean, or other nonwhite race, and persons of mixed white and nonwhite parentage.

**Persons per room.**—The number of persons per room, used as an index of crowding, has been computed for each occupied unit. The number of dwelling units classified as having more than one and one-half persons per room is shown for each area. All persons enumerated in the Population census as members of the household (including lodgers, servants, and other nonrelated persons) are counted in determining the number of persons that occupy each dwelling unit. The number of rooms in the dwelling unit includes all rooms available for use throughout the year. Bathrooms, closets, pantries, halls, screened porches, and unfinished rooms in the basement and attic are not counted as rooms.

**State of repair and plumbing equipment.**—Instructions to enumerators specified that dwelling units were to be classified as "needing major repairs" when repairs were needed on such parts of the structure as floors, roof, plaster, walls, or foundations, the continued neglect of which would impair the soundness of the structure and create a hazard to its safety as a place of residence. The data on state of repair are tabulated in combination with selected types of plumbing equipment and are therefore limited to dwelling units for which all of the various items in the combination were reported. In table 3 the phrase "needing major repairs" has been shortened to "needing repair" because of the space limitation.

**Contract or estimated rent.**—The average monthly rent or rental value of all dwelling units in each block is obtained by dividing the total amount of rent or estimated rental value reported by the number of dwelling units for which these items were reported. The enumerator was instructed to report for each tenant-occupied nonfarm dwelling unit the monthly contract rent, or, if no cash rent was paid, the estimated monthly rental value based on rents for similar dwelling units in the neighborhood; for each owner-occupied nonfarm dwelling unit, the owner's estimate of its monthly rental value; and for each vacant unit, the rent asked or the estimated rental value. The rental reported for a vacant seasonal dwelling unit represents the actual or estimated monthly amount charged for the unit during the portion of the year it is generally occupied; in resort areas, the average rent may be relatively high for this reason.

**Mortgage status.**—The mortgage data presented relate to owner-occupied nonfarm dwelling units in structures without business and containing not more than four dwelling units. Such a dwelling unit is classified as mortgaged if there is an indebtedness in the form of a mortgage, a deed of trust, or a land contract that is secured by it or by the property of which it is a part.

**Dwelling units reporting.**—All dwelling units are classified by occupancy and tenure, and all occupied units are classified by color of occupants. The corresponding percentage distributions shown for these items in table 1 are based on all dwelling units and all occupied units, respectively. For other subjects, such as state of repair and plumbing equipment, the percentages shown are based on the dwelling units for which specific characteristics are reported, that is, the total shown as "number reporting." The number of dwelling units for which the enumerator obtained no report on a particular item is shown for the city totals only; however, the corresponding figures can easily be derived for each area presented in tables 2 and 3 by subtracting the number reporting from the total number of dwelling units (or total occupied) shown for the area.

**Use of map—Block identification.**—Blocks are identified by serial numbers, a separate series of numbers being used for each tract. Thus, the location of each block for which data are presented in table 3 may be determined by referring to the tract designation and block number shown on the map which is presented in this Supplement. Similarly, data for a specific block or group of blocks may be readily located in the table if reference is made to the map for the tract designation and block number.

If no dwelling units are reported for a block, the block number is not listed in table 3, although it is shown on the map. Dwelling units for which the block number was not reported are indicated in the table by the symbol "NR." It will be noted that detailed data are not shown for such dwelling units, nor for blocks containing fewer than three dwelling units. However, all dwelling units are included in the combined statistics for the city and for each tract.
